AIF AZMI

BSc (Hons) Software Engineering – ICBT Campus – Affiliated with Cardiff Metropolitan University, UK
Galle, Sri Lanka · aifazmi1222@gmail.com · +94 74 010 3112

PROFESSIONAL SUMMARY

I am a motivated Software Engineering Fresh graduate with proven academic excellence and strong performance in advanced computing subjects including Professional & Ethical Issues in IT, Advanced Programming, Analytics & Business Intelligence, Computational Intelligence, and Machine Learning. Successfully completed a Machine Learning–based final year project with high grades.

Hands-on experience in web development, full-stack engineering, software lifecycle, and DevOps practices. Skilled in automation, continuous integration & deployment workflows, cloud environments, Linux systems, and containerization. Passionate about developing scalable, secure and efficient solutions while continuously learning and improving.

KEY SKILLS

- Languages & Frameworks: Java, Python, JavaScript (React), PHP, Spring Boot, Mernstack
- Web: HTML, CSS, Bootstrap, React, Express.js, node.js, Angular
- Databases: MySQL, MongoDB, Postgres SQL
- DevOps & Tools: Linux administration, CI/CD Pipeline, containerization concepts, Docker, Terraform, Ansible, Kubernetes, Log management with Open Search
- ML & Data: Machine learning model development and evaluation, Analytics & Business Intelligence
- Other: Git, REST APIs, software design, unit testing, Agile/Scrum fundamentals

EDUCATION

BSc (Hons) Software Engineering – Cardiff Metropolitan University, UK (2025–Present)

- Final project: Deep Learning Skin Burn Classification System – achieved excellent marks.
- Strong performance in advanced modules including software engineering & analytics.

Higher Diploma in Computing & Software Engineering — Cardiff Metropolitan University (ICBT) — 2022–2024

- Top marks for final project (real-time diving centre website).

Foundation Diploma in ICT — ICBT Campus — 2022
G.C.E O/L (English Medium) — St. Aloysius College, Galle — 2011–2021

PROFESSIONAL EXPERIENCE & CERTIFICATIONS

- Higher Diploma in Computing & Software Engineering — High scoring final project.
- Advance Diploma in Cyber Security and Ethical Hacking UGC Recognized – SITC campus
- Mastering CI/CD Pipelines – Hands-On Guide – Learnfi Academy
- CLOUDPATH PRO – From Zero to DevOps Professional – Learnfi Academy
- Front End Development — CODL University of Moratuwa
- Web Designers for Beginners — UI/UX design foundation
- Diploma in ICT — ICBT Campus
- Forage Job Simulations: MasterCard Cybersecurity, TATA Security Analyst, ANZ Security Simulation
- SOC Level 1 — TryHackMe
- Threat Landscape — Fortinet Training Institute
- Cisco Ethical Hacking

Linux Systems Administration and DevOps Engineering — WSO2 Certifications | Date Certified: 06.03.2026
Training Program conducted by WSO2. Topics covered:

- Linux Administration and Troubleshooting
- Introduction to Networking Concepts
- Virtualization (QEMU) and Containerization (Docker)
- Introduction to Kubernetes
- Introduction to Infrastructure as Code Using Terraform and Pulumi
- Log Management with OpenSearch
- Introduction to Information Security Concepts
- Zero Trust Architecture
- Identity and Access Management
- Configuration Management and Automation with Ansible
- Introduction to eBPF and Service Mesh
- Platform Engineering and Building Platforms
- IT Law
- Business Continuity and Disaster Recovery
- Final Assessment – Group Project

PROJECTS

- Machine Learning Dissertation Project — Built & evaluated ML model with strong grading.
- Mern Stack E-commerce Website
- Gallery Café — Full-stack web app (HTML, CSS, JS, PHP, MySQL)
- Mega City Cab — Spring Boot + MongoDB ride system
- Student Management System — Java + MySQL
- E-commerce Website — React/Node/MongoDB
- Task Manager App — Flutter and Firebase
- Library Management System — C++

DEVOPS EXPERIENCE

- Linux system usage & server environment familiarity.
- CI/CD pipeline concepts and automation strategies.
- Monitoring/logging — Splunk & Elastic for debugging visibility.
- Network packet analysis using Wireshark.
- Version control workflows with Git.

ADDITIONAL INFORMATION

Languages: English (Fluent)
Availability: Immediate
Interests: Machine learning, DevOps automation.
